

Shoot Like a Professional!

June 19 ~21, 2009

We always have so many requests for this type of workshop "after the fact". Please help us pass the word and reach those who are interested in participating before it's too late.

Hands-on Intensive Weekend Workshop is designed for those who want to learn by doing. Professional filmmakers will walk you through each stage of production as you're shooting using the beautiful (flowers, nature, buildings, playground, historical landmarks, museum and more) park grounds as your source of inspiration.

- Screenwriting Pointers
- Camera Techniques
- Visual Storytelling
- Lighting (interior/exterior)
- Directing for camera

This is a workshop you will not want to miss. Whether you're a beginner, film student or working filmmaker, you'll walk away from this workshop with a new perspective on how to improve your quality of work. The intensity of it all will completely engulf you.

We especially welcome those interested in documentary and webcast production.
